Janus EN 1627 RC3 & RC4

Interlocking doors complete with high security motorised electronic locks

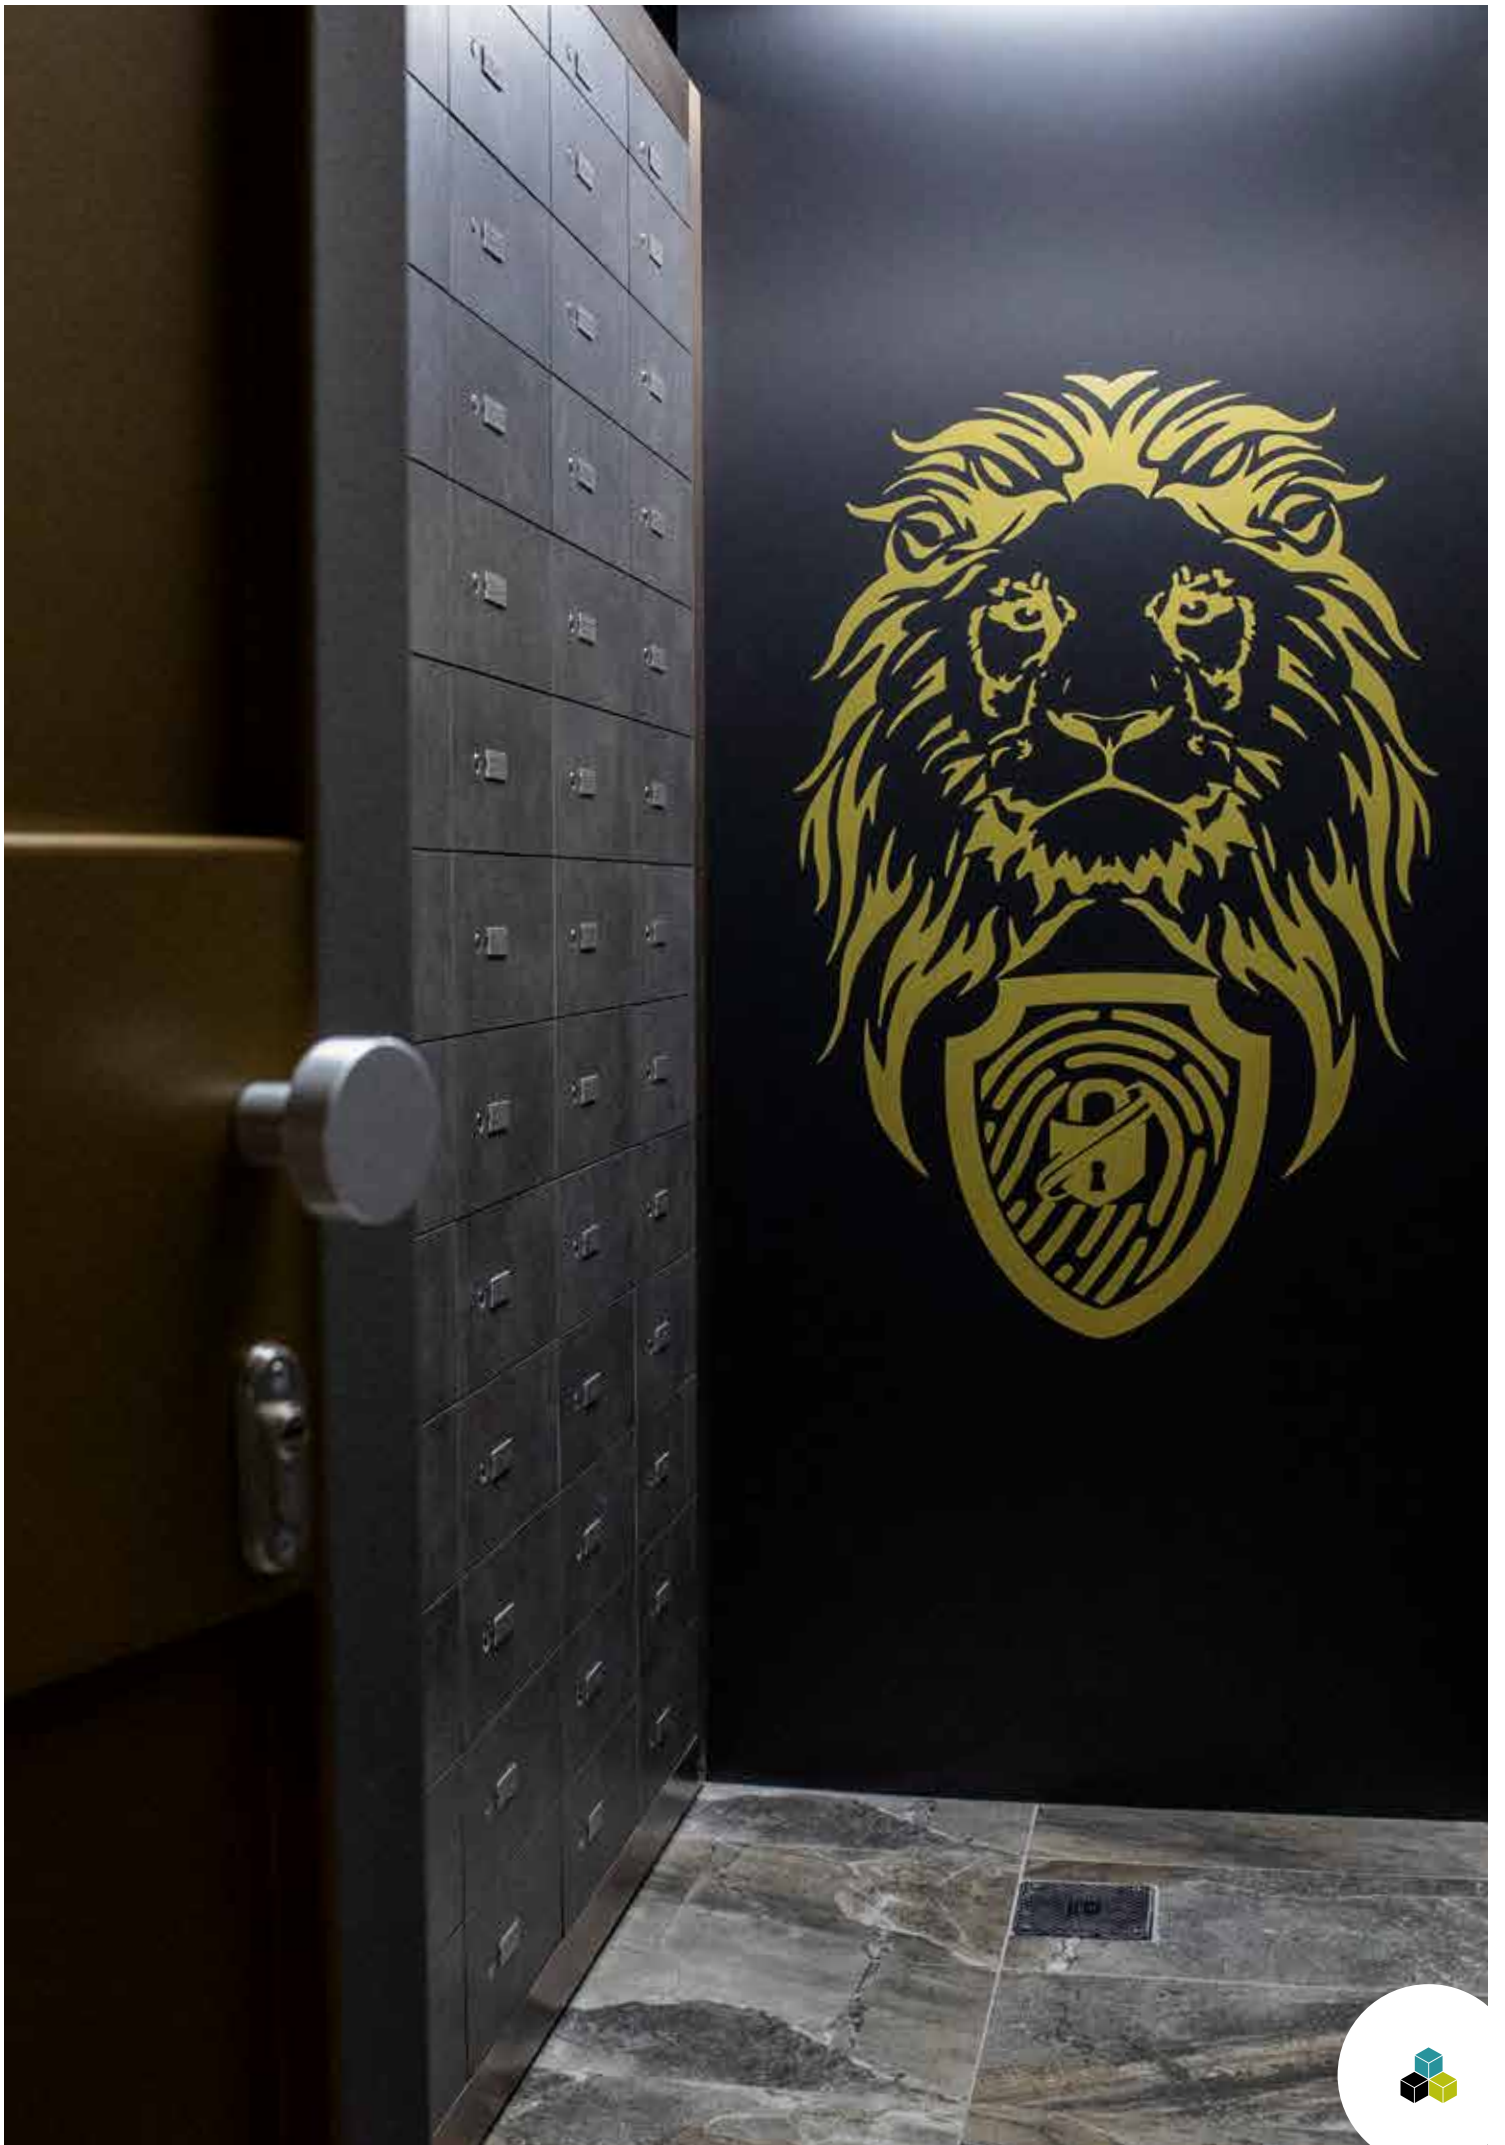

To be defined as “perfect” a door nowadays must be safe

Anti-bandit Security Screen

Pass through tray and speech system

Our capabilities extend beyond standard offerings, as we are proficient in custom fabrication to meet your unique specifications and requirements

Quality Come as a Standard

Our Janus armoured security doors with motorised locks, and biometric interlock system protect the entrance and air lock which is installed with an anti-bandit security screen, pass through tray and speech system to the control office, protecting and providing controlled access to the registration area.

Each internal wall, viewing room and office are built from our Embassy modular security walling panels for additional security. Kronos SR4 certified security doors are provided for fire escapes.

The Vienna safe deposit box system is a high quality customisable dual high security key or key and electronic system with access control software for full operational control and auditing. Vienna comes with inner cassettes as standard with most sizes and we have various options for the door fascia to suite your design.

Every area and product can be individually controlled, monitored and alarmed for your peace of mind. Additional steel walling, fixed bar sets installed and welded by our engineers to the perimeter walls and windows. Security window film installed to all external windows.

We believe passionately in having our products independently tested and certified to UK & European standards by internationally recognised institutions. We believe that this is the best way to ensure quality, consistency, and reliable security levels of protection.

IF IT MATTERS TO YOU, SECURE IT WITH US...
