Your Trusted Global Partner in **Physical Security**

With 35 years' experience in the Physical Security sector, Burton Security is your trusted partner and specialist for secure rooms, panic rooms, vaults and other physical security.

With customers in the UK, Europe, the Middle East, Africa and Asia we have a truly global outlook and a wealth of experience delivering high security, tailor made solutions for our customers.

Our Values, **Our Mission**

We have the values of a family business, looking after our customers, our staff and our local environment. **We are proud of our Yorkshire heritage**, whilst retaining a global outlook.

First and foremost, our mission is to deliver **Physical Security** to protect people, assets and the most prized possessions of our clients.

We believe in independent testing and certification of our products to UK & European standards. This is the best way to deliver the highest levels of proven security. We are also passionate about giving the customer what they want and finding the right solutions to their needs. **The result is that we have become specialists in customised and tailor made solutions.**

BRE Global is a world leading research, testing and certification body. It has published several security standards, covering a wide range of product types.

LPS1175 is a standard that focuses on the physical security of intruder resistant products. It is a standard for protecting against forced entry (without fear of making noise), to delay attackers' attempts to gain unauthorised entry. It is a particularly tough standard in which 95% of products fail testing.

Testing uses different sets of tools which are graded according to a combination of power, effectiveness, ability to obtain, conceal and transport. The tool sets range from A-H (A being lowest). Products are attacked with the chosen tool sets and the time to gain access is recorded. A score is then given which is displayed as a letter A-H for the tool set and a number 1-20 to indicate the time in minutes.

Laboratory timings do not reflect real world times, which might typically take 3 times longer.

LPS1175 draws on extensive research conducted over many years by the Police, Insurers & UK Government, as well as by BRE experts.

www.redbooklive.com

What is LPS1175

BRE Global works closely with government, police, insurers, consultants, architects, and end users to develop standards and certification schemes. These ensure security equipment and systems deliver effective levels of protection against a range of hostile threats, including criminals and terrorists.

LPS1175 Issue 8

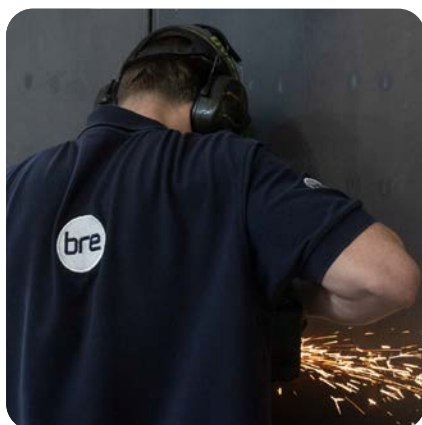

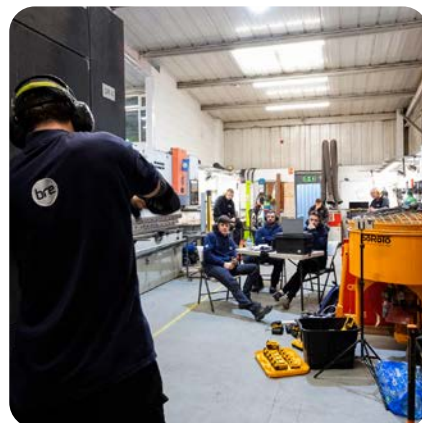

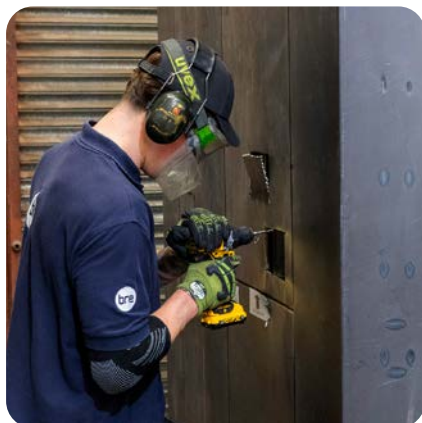

LPS1175 has been developed to protect critical infrastructure, government buildings and commercial enterprise against physical attack from criminals, terrorists, protesters and vandalism.

EMBASSY ROOMS

LPS1175 Issue 8

*Saving people
& property*

Protection against high powered, portable electric tools and large sledge hammers & axes

What are Embassy Rooms?

LPS1175 Issue 8

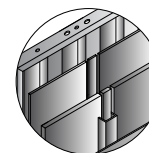

Embassy is a modular vault walling that can be assembled together on site to form individual walls or complete rooms. It has been specifically designed to be quick and simple to install in both residential and commercial premises.

The panels are all made to order to fit the specific dimensions of your property. You can use Embassy to form a new stand alone room or to line the walls of an existing building.

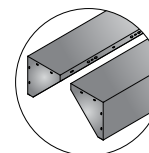

Panels are prefabricated in the factory and bolted together on site. This reduces the impact and cost of installation.

No hotworks are required, its lightweight, thin and easy to decorate, making it an ideal product for residential security.

SECURITY IS OUR TOP PRIORITY!

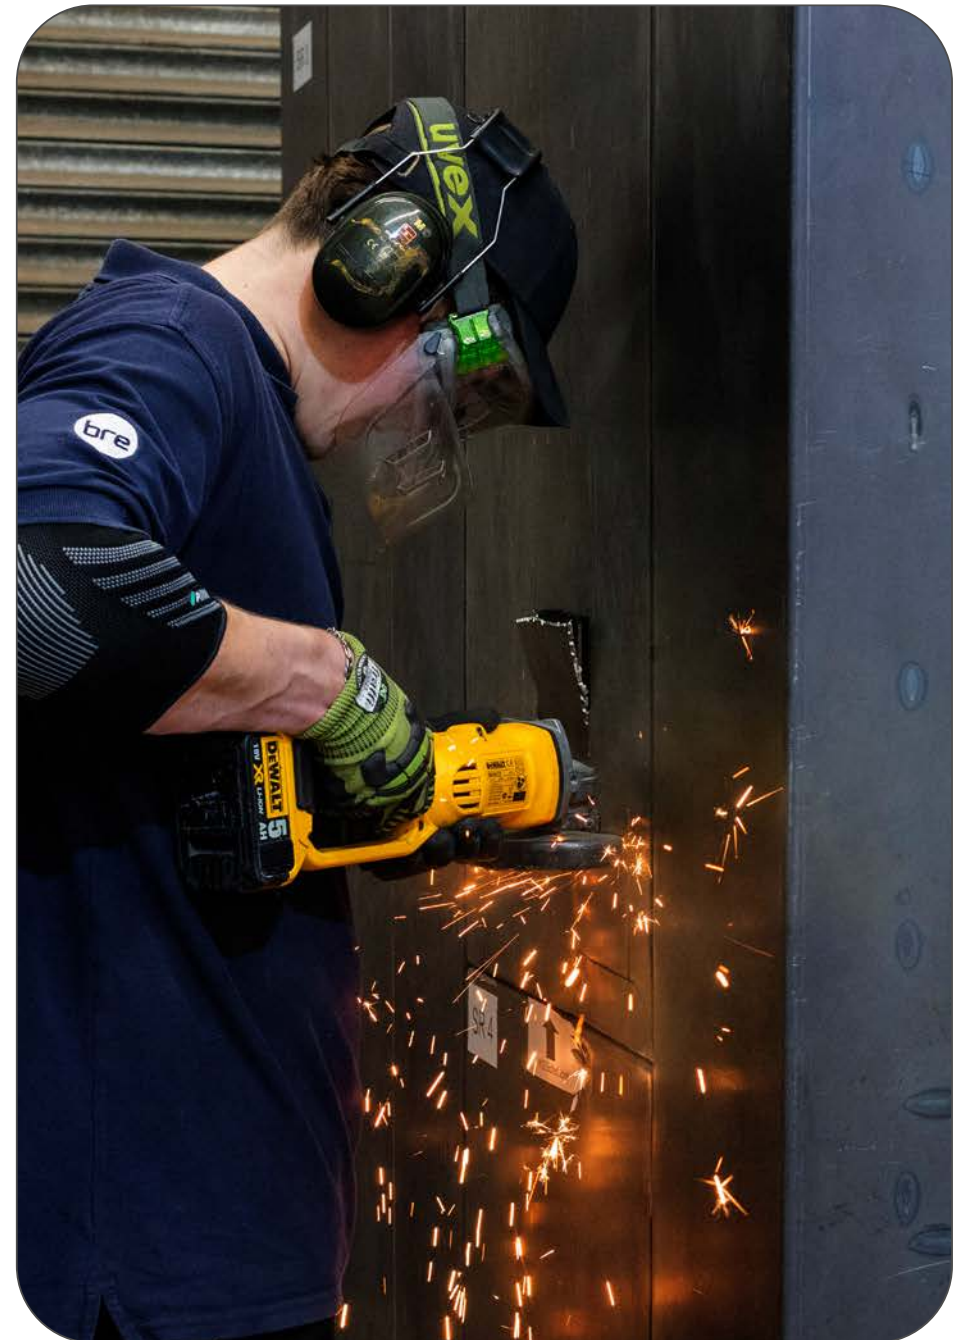

OUR PRODUCT RANGE

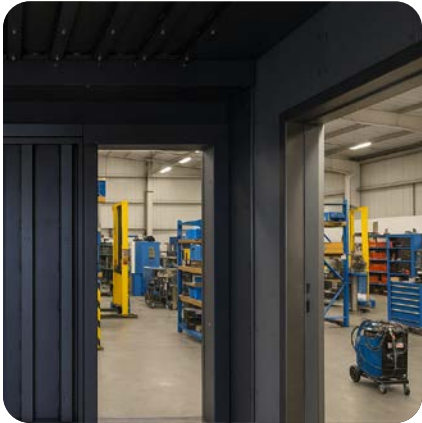

Modular Security Panel levels

Protecting your property and valuables against differing threats from simple, low tech tools, to large axes and high powered, portable grinders, cutters & saws

EMBASSY ROOMS ARE SUPPLIED IN A RANGE OF SECURITY LEVELS TO MATCH YOUR RISK AND CAN OPTIONALLY BE OFFERED WITH A BULLET RESISTANT STEEL LINING.

Who are Embassy Rooms For?

1. Protect you and your family against aggravated burglaries or targeted attacks in your home.
2. Protect against the theft of cash and valuables in commercial premises.
3. Protect critical infrastructure against theft, vandalism and terrorism.

Embassy Rooms are an extremely versatile product range.

They are an ideal solution for residential panic rooms because they offer high levels of security without losing valuable internal space. The versatile installation and finishing options also make them easy to locate and seamlessly blend in with your property. In residential properties, Embassy can also be used as a burglary resistant room for artwork, antiques, shoes, clothes and wine storage.

Because of the high security levels and the competitive price, Embassy is a good solution for cash and high value goods storage in commercial premises. It is ideal for luxury goods warehousing, jewellery stores, retailers, banks and ATM pods.

LPS1175 certification makes Embassy a good solution for the protection of data centres, laboratories, police & government institutions, telecoms and other sensitive sites.

The bullet resistant linings, combined with independently tested antiricochet tiles mean that Embassy is an ideal option for armouries and weapons storage.

What do Embassy Rooms Protect Against?

Embassy Rooms are designed to protect against physical attack and burglary. They are offered in a variety of security levels focusing on the LPS1175 toolkits C to E.

This means they can protect against a range of weapons including sledge hammers, large axes, grinders, rip saws and drills.

Embassy rooms can be offered with additional ballistic steel linings to protect you and your family against the threat of hand guns and even assault rifles.

Weapon type		Caliber	
Rifle		22LR	
Automatic pistol		9 mm Luger	
Hand gun		357 Magnum	
Hand gun		44 Rem. Magnum	
Kalach-nikov		7.62 x 39	
Assault rifle		5.56 x 45	

Installation

The thinnest, lightest and easiest to install solution on the market.

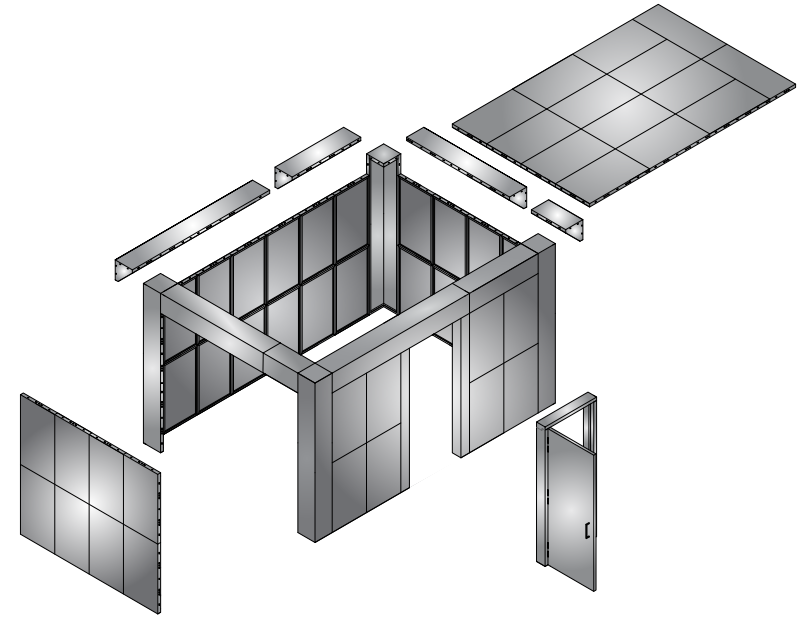

Embassy rooms are delivered in relatively small panels that are assembled and bolted together on site. This minimises disruption and allows installation on upper and basement levels with relative ease.

Each project is fully managed and designed in-house, meaning that we can guarantee complete privacy and discretion. Our experienced security team will first discuss your specific requirements, developing your concept into a tailored, functional design.

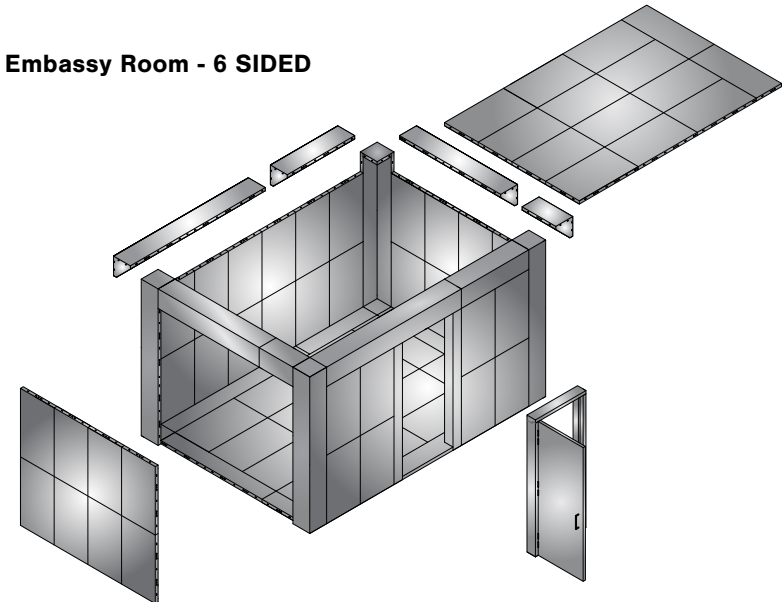

Burton Security's core principle is to ensure products are tested to the highest standards. We are proud to have tested products to LPCB standards and feature in Red Book Live.

E1 Embassy Room - 5 SIDED

E6 Embassy Room - 6 SIDED

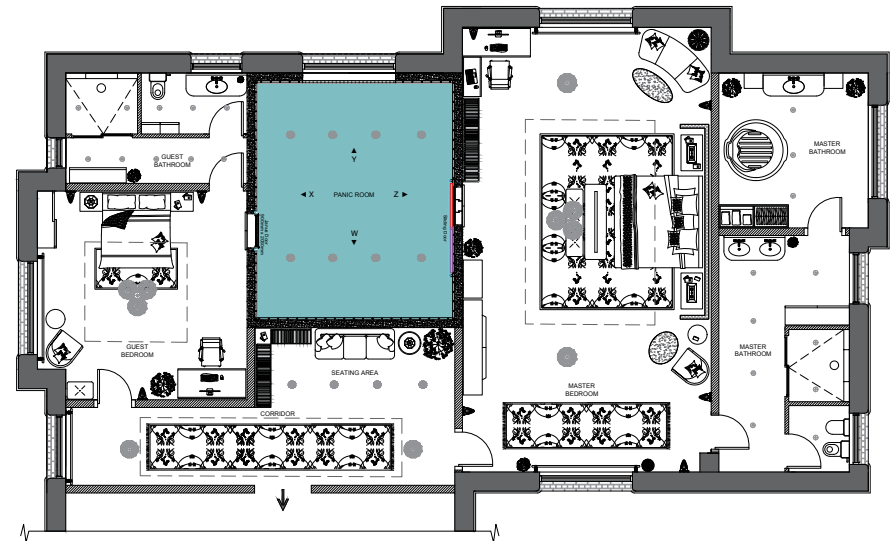

Where can you install Embassy Rooms?

Embassy rooms are extremely versatile. They can be installed in bedrooms, dressing rooms & bathrooms, as well as warehouses, laboratories and retail stores. They are easy to finish and decorate according to the environment in which they are installed.

What makes Embassy Special?

- Its thin, so you don't have to lose precious space in your home
- Its light, making upstairs installation easier
- Electrics and pipes can be accommodated
- Its pre-fabricated in the factory making the installation clean and quick
- Once installed it is easily decorated over

E6 EB6	Heavier duty multi layered steel and composite panel fabrication wall panel with higher level hardened additional steel bracing and ultra hardened thicker ballistic steel	6 + 6B	-	FB6	Professional attempts at forced entry into higher value storage areas and threat to life, Including the use of rifles.	56mm	121 kg
ARM	Special rubber tiles mounted on a proprietary framework. Must be used in conjunction with EB6.	-	PBL certified	7.62mm Steel FMJ	Ideal for armouries to avoid the danger of bullet ricochets	+52.5mm	20 kg

Kronos Doors

Commercial doors

Secure your room with our high security steel doorsets. Tested and certified to LSP1175, the Kronos range offer reliable and proven security for commercial environments.

A range of locking options can be supplied including mechanical, electro-mechanical and panic escape.

High security steel doors

Ideal for warehouse environments
& some critical infrastructure sites

Metal+ Doors

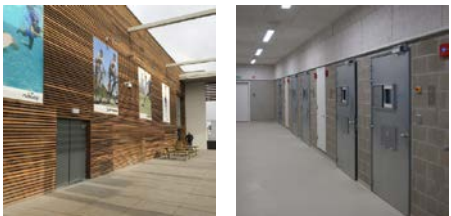

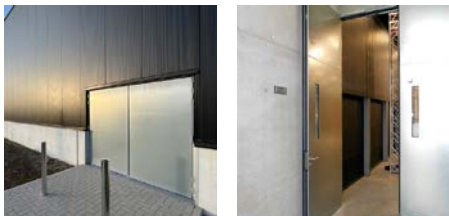

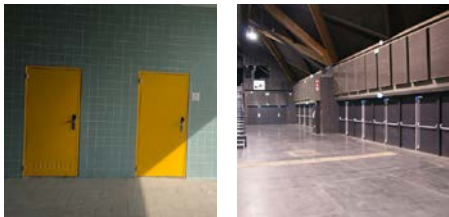

Commercial doors

Metal+ doors are built to last and aesthetically pleasing. They are premium door sets, offering unrivaled combinations of performance and operation.

Tested and certified to EN1627, LPS1175, EN1522 & EN1634.

They offer a wide choice of locks, controlled entry and exit and remote monitoring.

Premium high security steel doors

High performance doors with optional fire, acoustic, ballistic, blast, wind and air tightness ratings

More aesthetically pleasing

Bigger choice of locking options

Long life - 10 & 15 year warranties

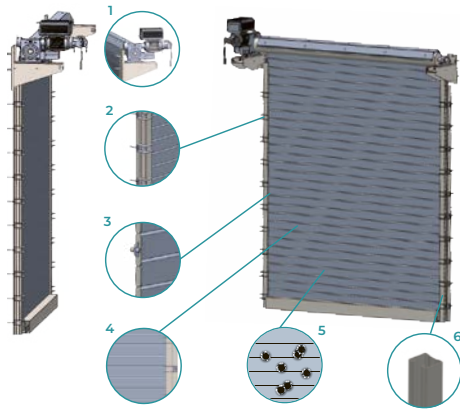

Embassy Armoured Shutters

Commercial shutters

Embassy shutters offer a wide range security levels, fire ratings and even blast and bullet resistance.

Suitable for commercial or residential use, they come in a choice of finishes and styles.

- 1 MOTORIZATION
- 2 GUIDE SUPPORTS
- 3 WHEEL PLUG SYSTEM
- 4 GALVANIZED STEEL SLAT
- 5 BULLET AND BURGLARY RESISTANCE SYSTEM
- 6 STRUCTURAL STEEL GUIDE

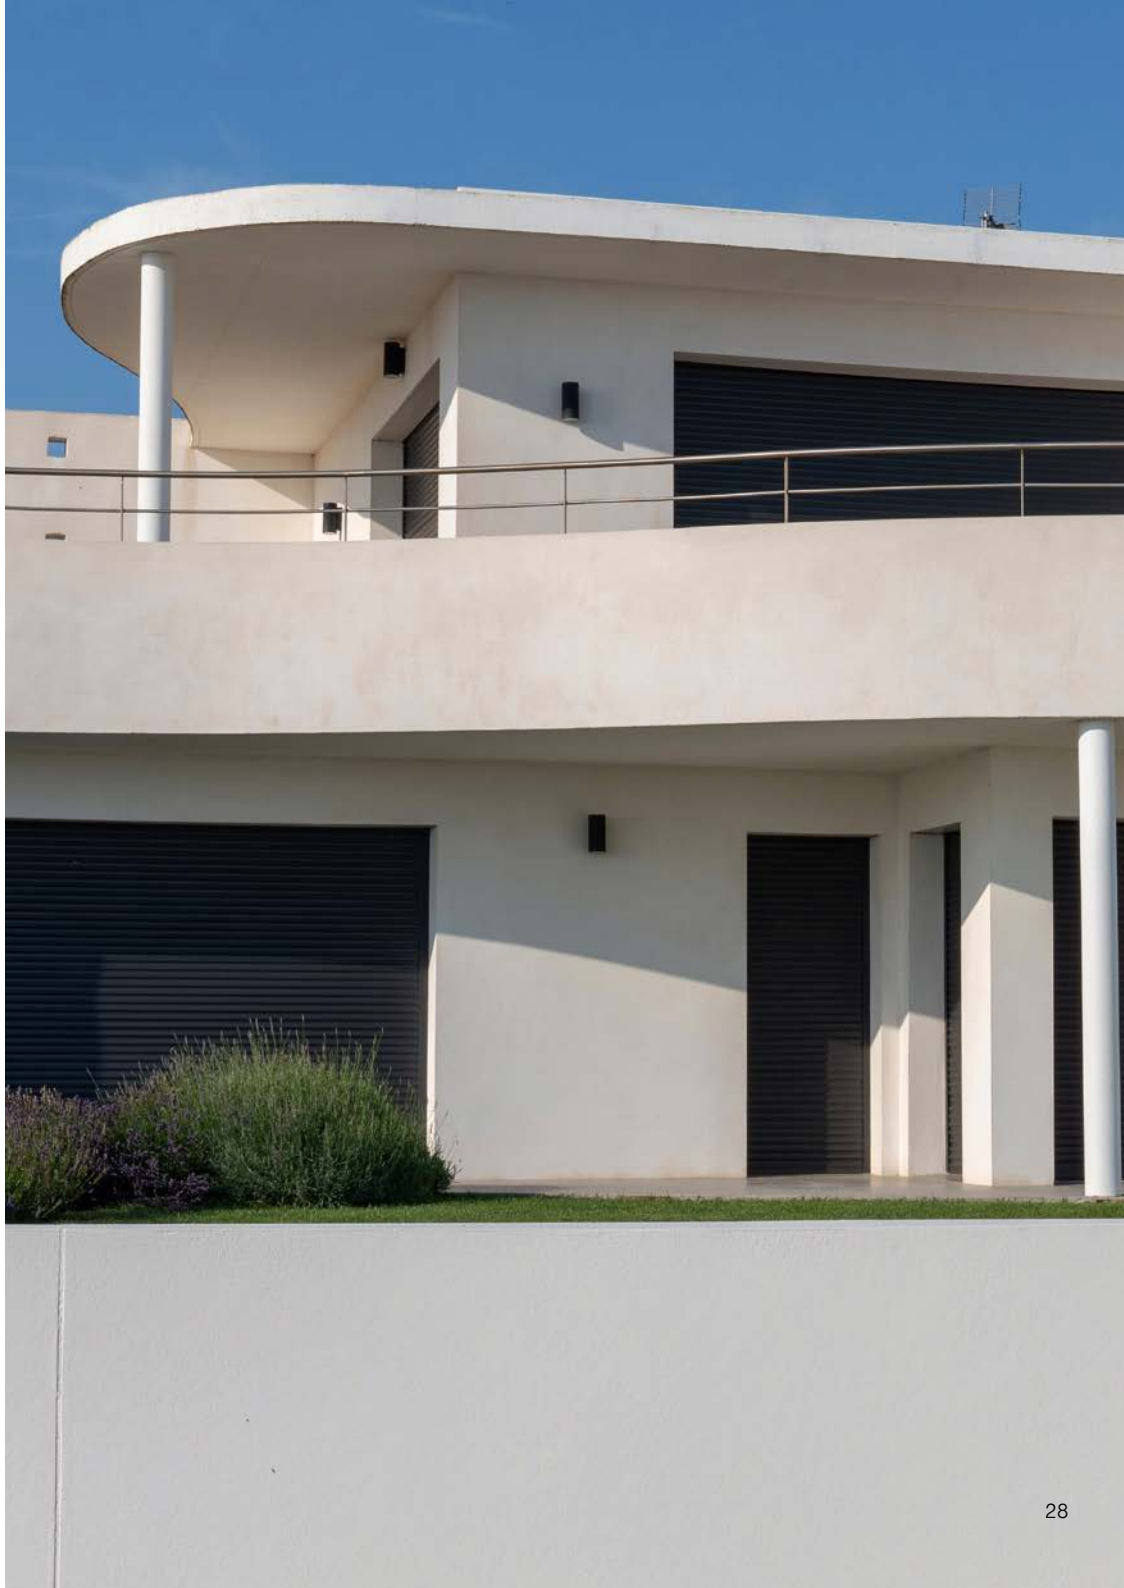

Commercial & residential solutions

Secure windows, garages and large openings

Automated closing

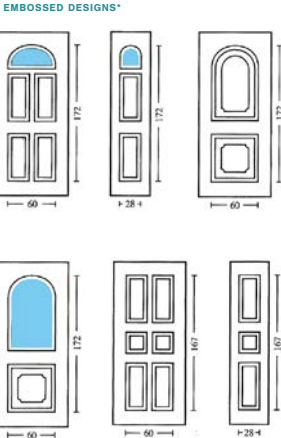

Optional fire, acoustic, ballistic, blast and wind ratings

Janus Armoured Steel Doors

Residential doors

High performance steel doors with wood cladding to blend into any environment. Offered with industry leading thermal and acoustic insulation they are ideal for residential use.

Tested to EN1627 RC4 and offered with optional ballistic ratings to FB6.

Cost effective

Large range of aesthetic finishes

Perfect for residential use

Optional ballistic ratings

Embassy Armoured Wood Doors & Windows

Residential doors

Discreetly secure your home with Embassy windows. Burglary and bullet resistant, yet beautifully designed to blend into high-end and heritage properties. Crafted from reinforced hardwood, they offer 24/7 protection without compromising style. Enjoy peace of mind and uncompromised aesthetics with windows that safeguard your family and home. Security you can trust, with elegance you'll admire.

Almost any design and finish is possible

Perfect for heritage & listed buildings where there is no possibility to compromise on aesthetics

Ideal for super prime & ultra prime residences

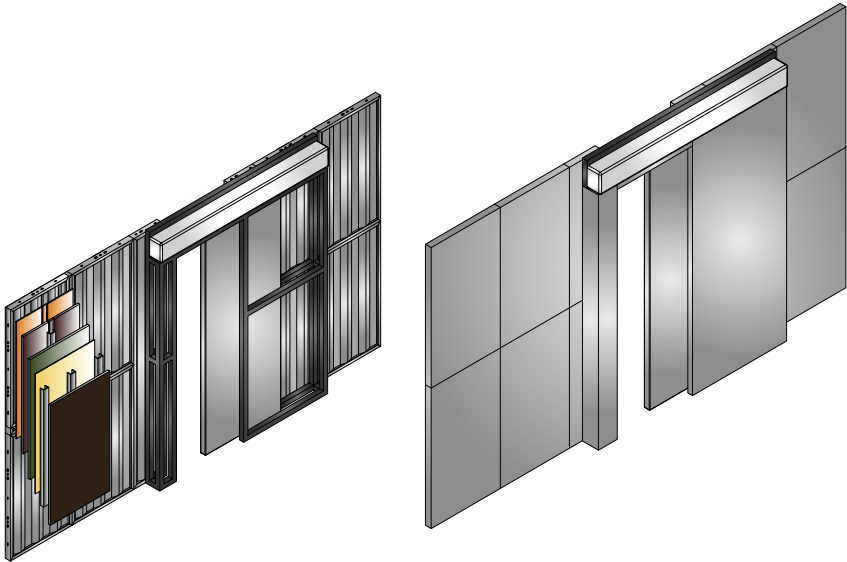

Both doors and windows can be secured

Optional ballistic & fire ratings

Sanctuary Pocket Sliding Doors

Residential doors

Sanctuary pocket doors maximize space without a fortress-like feel. Hidden within the wall, the sliding mechanism deploys when needed. Ideal for dressing rooms or areas where open plan is preferred over traditional hinged doors. They discreetly conceal panic rooms from staff or tradespeople, maintaining both functionality and privacy within the property.

Space saving solution for residential properties

Ideal for dressing rooms and open plan spaces

Optional ballistic ratings

Manual or automated operation

Our growth is through design,
innovation and investment
in British engineering.
